

TATTOO AFTERCARE

with
Saniderm

WHILE FOLLOWING YOUR ARTISTS WORDS AND TIPS FOR AFTERCARE, HERE ARE THE TYPICAL STEPS FOR THE HEALING PROCESS AS IT IS NOW IN YOUR RESPONSIBILITY.

-SANIDERM IS RECOMMENDED TO BE LEFT ON FOR 3 DAYS BEFORE REMOVING. THOUGH IT IS WATERPROOF AND YOU'RE ABLE TO TAKE A SHOWER, DO NOT SUBMERGE IT IN WATER. NO BATHS AND ESPECIALLY NO SWIMMING FOR AT LEAST 2 WEEKS PRIOR TO REMOVING THE BANDAGE. YOUR NEW TATTOO IS STILL CONSIDERED AN OPEN WOUND. DURING THESE 3 DAYS YOUR TATTOO WILL BE WEEPING OUT A MIX OF BLOOD, PLASMA, AND INK. DO NOT WORRY, LET IT DO IT'S THING.

-ITS BEEN 3 DAYS! IT'S EASIEST TO REMOVE YOUR BANDAGE IN THE SHOWER. USING YOUR CLEAN HANDS, GIVE IT A GOOD WASH USING A NON FRAGRANCED ANTIBACTERIAL SOAP SUCH AS DIAL. DO NOT SCRUB IT OR EXFOLIATE.

-NOW YOU NEED TO DO YOUR BEST AT KEEPING IT CLEAN MOISTURIZED. HUSTLE BUTTER TATTOO AFTERCARE THAT WE SELL IN SHOP WORKS AMAZING AND SMELLS GREAT, AQUAPHOR ALSO WORKS WELL. WITH EITHER PRODUCT YOU ONLY SHOULD BE USING A SMALL AMOUNT THAT WILL LEAVE A THIN LAYER OVER YOUR TATTOO. IF SCABBING OCCURS IT IS IMPORTANT TO NOT PICK THEM.

-WE DO NOT RECOMMEND USING PURE PETROLEUM JELLY OR VASELINE, AS THOSE PRODUCT DO NOT ALLOW ENOUGH AIR TO HAVE CONTACT WITH THE SKIN AND CLOG THE PORES. WHICH CAN LEAD TO POOR HEALING AND EVEN INFECTION.
